

BDA and MIL Tracking Service Accuracy - August 1996

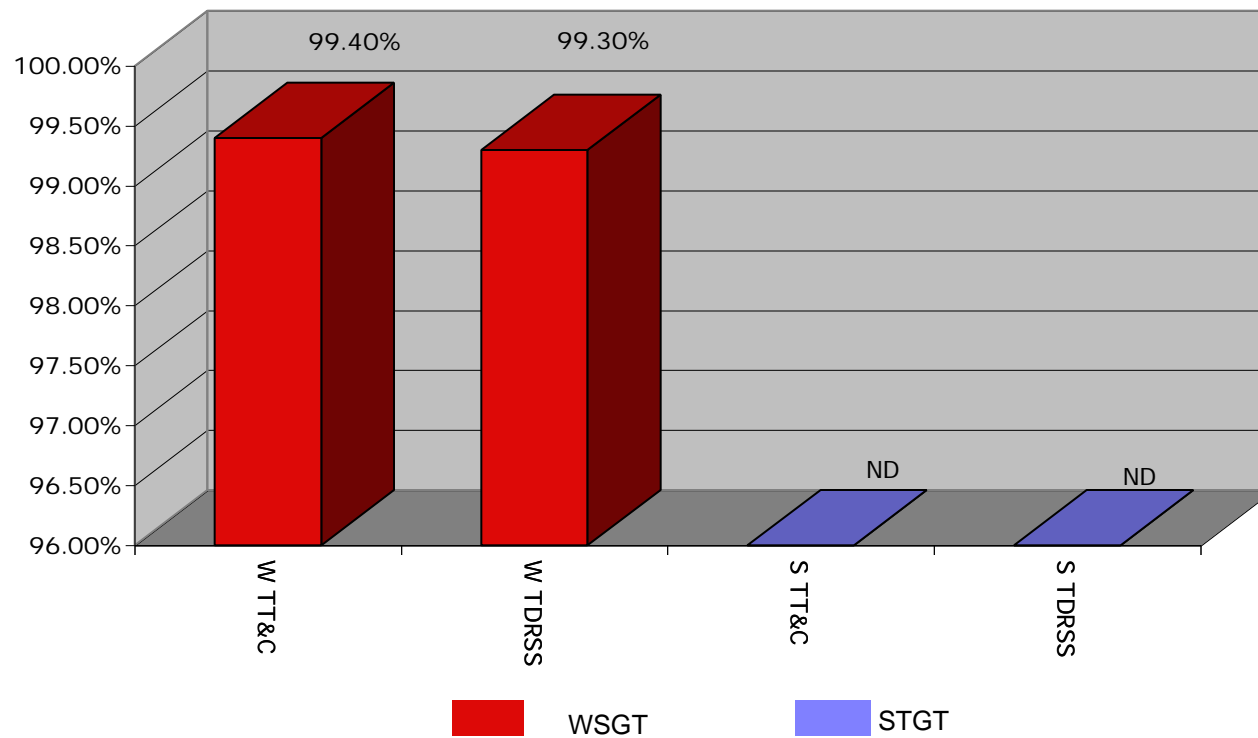

Notes:

1. 21 passes on the Wallops 9m antenna had poor X-angle data, however overall still met angle accuracy criteria.
2. 1 pass on the Wallops 6-/7.5m-1 antenna had a 3.0 km range bias.
3. 1 pass on the PFRR 8m-1 had static range-rate observations.

WSC Tracking Service Accuracy - August 1996

Notes:

1. 12 events on the WSGT TT&C had range biases indicative of phase reversals and/or range tone shifts.
2. Most of the WSGT TDRSS unusable data was due to data flagged invalid.
